SUBJECT INDEX

Auditory system of the guinea pig, Horseradish peroxidase acute ototoxicity and the uptake and movement of the peroxidase in the	187
Bronchial epithelium, Influence of temperature and decreased water content of inspired air on the ciliated	124
Caloric stimulation, Response of single purkinje neurons in the flocculus of albino rabbits to	98
Caloric testing method among normal subjects, Results of new air, Part II	178
Cochlea, Glycogen in the, during development	12
Cochlear lesions, Slow evoked cortical responses to linear frequency ramps in subjects with	213
Corti in the guinea pig, Comparative surface studies of ototoxic effects of various aminoglycoside antibiotics on the organ of	57
Corti's organ, A note on development of	238
Electrocochleography, Bone-conducted stimulation in	377
Electrocochleography used as a clinical hearing test in difficult-to-test children	385
Endoscopy, A dental splint for use during peroral	450
ENG test, Normal values in a routine	91
Enzymatic activity of inner and middle ear fluids in fetal guinea pigs under ambient and high-intensity sound presentation	233
Facial palsy, The reliability of level-diagnostic examinations in acute, peripheral	414
Gentamicin-induced changes in RNA content in sensory and ganglionic cells in the hearing organ of the lizard <i>Calotes versicolor</i>	361
Hearing sensitivity, cochlear sensorineuro-epithelium and vasculature of the chin-chilla, The effect of high level sound on	44
Kanamycin ototoxicosis, Quantitative analysis of	202
Laryngeal papilloma, Nuclear bodies in	429
Laryngeal pathology, Acoustic measures for detecting	105
Maxillary sinus secretions, Purulent and non-purulent, with respect to pO ₂ , pCO ₂ and pH	138
Maxillary sinusitis	440

Maxillary sinusitis, Penetration of erythromycin stearate into maxillary sinus mucosa and secretion in chronic	292
Meniere's disease, Macula utriculi in four cases with	307
Middle ear effusion, Azidocillin and ampicillin concentrations in	227
Nasal mucosa, Studies on the allergen-challenged human	281
Nasal resistance, Changes in human, associated with exercise, hyperventilation and rebreathing	416
Nasal vasculature of the cat, Sympathetic nerve pathways to the	278
Noise levels in ear surgery, Variables affecting the drill-generated	252
Nose, Measurements of the air conditioning capacity of the, during normal and pathological conditions and pharmacological influence	266
Nystagmus in human subjects, The influence of linear acceleration on optokinetic	338
Olfactoria, Die Oberfläche der Regio, des Menschen im Rasterelektronenmikroskop	145
Optokinetic test comprising both acceleration and constant velocity stimulation (ACV-OKN test)	155
Otoconia, Metabolic disorder of, after streptomycin intoxication	65
Rhinitis, Acupuncture and phonostimulation in pollenosis and vasomotor, in the light of psychosomatic investigations	446
Rhinitis, Disodium cromoglycate nasal spray in the treatment of perennial	287
Rhinitis, The frequency and importance of bronchial hyperre activity in patients with allergic and non-allergic	422
Round and oval windows, Volume-pressure properties of	38
Round window membrane lesions, Experimentally induced	1
Semicircular canals, The importance of potassium in the function of frog	344
Sinus diseases, Acidic glycosaminoglycans in the ground substance in paranasal	434
Stapedectomy, Long-term results after	260
Stria vascularis, Pigmentation of the	24
Threshold shift in ear surgery, Peroperative temporary	393
Tonsillar lymphocyte subpopulations to produce interferon, Studies on the capacity of human	296
Tracheopathia chondro-osteoplastica	118
Tympanic membrane, The influence of perilymphatic pressure on the displacement of the	220
Tympanic membrane, Volume displacement of the, in the sitting position as a function of middle ear muscle activity	402
Vestibular and optokinetic responses of the white cat	72
Vestibular compensation and habituation in the cat, Action of alcohol on	317
Vestibular neurons, Responses of squirrel monkey, to audio-frequency sound and head vibration	352
Vestibular nuclei, Fine structure of the medial and descending, in normal rats and after unilateral transection of the vestibular nerve	80
Vestibular nuclei of the awake cat, Labyrinthine input to the	328
Vestibular nuclei unit of the rat, Convergence of ampullar and macular inputs on	166
Vocal muscle during phonation, Firing pattern of motor units on the	132
Xylene exposure	370
